

WE LOVE THE FUTURE

Humans are creative beings. We design our environment, bend it to our will. We now live in the Anthropocene: there is no place left on our earth that has not been determined by human intervention. The impact of design cannot be overstated. Design could play an important role in dealing with the major challenges that currently await us.

We can take this one step further
Designers and artists can make us imagine and experience alternatives, to take us to futures that we want. During 'WE LOVE THE FUTURE', we playfully explore what this means for design in general and designers and artists in particular.
